

Offer Swissdox@LiRI

By using the data from the Swiss media database, you accept the following terms of use:

- The data from the corpus may only be used for research and academic purposes. Any commercial use of the data as well as any derivatives is not permitted.
- The data from the corpus may only be used for the declared research project. The reuse of data or any portion of the data for any purpose other than the declared research project is prohibited. Further research projects must be registered individually.
- The data from the corpus may not be downloaded in its entirety. Thus, data obtained for an individual research project may not include all texts within the corpus.
- The data from the corpus may only be stored locally on devices of the researchers and students or on infrastructure of the contractual partner (academic institution). In particular, storage on third-party cloud platforms (e.g. Dropbox, Google Docs, Google Cloud Platform, Amazon Web Services, Microsoft Azure) is not permitted.
- Data from the corpus may not be shared with third parties.
- The data obtained from the corpus must be deleted no later than six months after the end of the research project. Archiving of the obtained data (locally or in any other archives) is not permitted. This does not apply to aggregated data or other derivatives, as long as these do not contain the entire raw data or sourced texts. The storage of derivatives is permitted provided the original data cannot be reconstructed from them.
- Details of the project title, project management and duration of the research project will be communicated to Swissdox and may be mentioned on the SMD/Swissdox and LiRI websites.

In case of violation of these terms of use, access will be terminated by the University of Zurich with immediate effect. In addition, UZH or the rights holders (Swissdox/publishers) may seek damages.
